Projects

Project Arcana AOSP

<https://projectarcana-aosp.netlify.app>

Tech: React, Tailwind and Firebase. Hosted on Netlify.

A simple website I created for a custom rom.

Agtatacay Sur Tracker

<https://tracker-capstone.netlify.app>

Tech: React, Tailwind and Firebase. Hosted on Netlify.

A website I created for my capstone. Tracks subjects, activities, students and calculates grades for the teachers and students to see by logging in on their computer and/or phones.

JVS POS System

<https://github.com/iaiaian1/JVS-Point-of-Sales-System>

Tech: C#

A point-of-sales system I created for a group project.

Soulsborne Save Manager

<https://github.com/iaiaian1/Soulsborne-Save-Manager>

Tech: C#

A simple app that can copy game save file to a designated folder in a set time interval or manually. Used to secure save file.
